¹"When an investigator, author, editor, or reviewer has a financial/personal interest or belief that could affect his/her objectivity, or inappropriately influence his/her actions, a potential conflict of interest exists. Such relationships are also known as dual commitments, competing interests, or competing loyalties. The most obvious conflicts of interest are financial relationships such as: 1) Direct: employment, stock ownership, grants, patents and/or 2) Indirect: honoraria, consultancies to sponsoring organizations, mutual fund ownership, paid expert testimony".
